

## Rapid mind mapping

Use this framework to represent ideas and organize them into a visual diagram clustered by association. Make use of the different zoom levels and color to see relationships, as well as discover hidden complexities and connections to facilitate decision making, effective brainstorming, exploration, and planning.

## Map your ideas

Start with your main idea as the central point, then add sub-themes to branch out and connect supporting ideas, concepts, or themes.

TIP

To quickly add a new circle, hold down the [option] key while you drag it. To quickly create a connector line, press down the [C] key, then drag your mouse.
